90940	GP prescribing for psychoses and related disorders: Items (quarterly) per 1,000 population	Υ				Υ	•	2	There are some concerns regarding the quality of this indicator	This indicator is not weighted to take account of differences in populations; the numerator is only for primary care prescribing and thus misses prescriptions in other settings, such as hospitals	June 2014
90527	Antidepressant prescribing: Average Daily Quantities per STAR-PU	Υ				Υ	9	3	The quality of this indicator is robust		June 2014
90529	Hypnotics prescribing: Average daily quantities (ADQs) per STAR-PU	Υ				Υ	0	3	The quality of this indicator is robust		June 2014
90371	New cases of psychosis: Estimated incidence per 100,000 aged 16-64	Υ	Υ	Υ		Υ	<u>•</u>	2	There are some concerns regarding the quality of this indicator	This is a modelled prediction so there is an inherent degree of uncertainty; the population denominator data used is pre-2011 census	June 2014
92653	Contact with mental health or learning disability services: rate per 1,000 population (Males)	Υ					0	2	There are some concerns regarding the quality of this indicator	Uses MHLDDS data - includes adults with learning disabilities Jan 2017	January 2017
92653	Contact with mental health or learning disability services: rate per 1,000 population (Females)	Υ					0	2	There are some concerns regarding the quality of this indicator	Uses MHLDDS data - includes adults with learning disabilities Jan 2017	January 2017
92653	Contact with mental health or learning disability services: rate per 1,000	Υ					0	2	There are some concerns regarding the quality of this indicator	Uses MHLDDS data - includes adults with learning	January 2017
92653	population (18+)  Contact with mental health or learning disability services: rate per 1,000	Y					0	2	There are some concerns regarding the quality of this indicator	disabilities Jan 2017 Uses MHLDDS data - includes adults with learning	January 2017
92653	population (18-64)  Contact with mental health or learning disability services: rate per 1,000	Υ						2	There are some concerns regarding the quality of this indicator	disabilities Jan 2017 Uses MHLDDS data - includes adults with learning	January 2017
92033	population (65+)	,					_	2	There are some concerns regarding the quality of this indicator	disabilities Jan 2017 The survey used to derive the estimates was	January 2017
91141	Estimated prevalence of mental health disorders in children and young people: % population aged 5-16		Υ	Υ			<u></u>	2	There are some concerns regarding the quality of this indicator	carried out in 2004 and no adjustment has been made for possible changes Poor data transfer between trusts and local	June 2014
90937	Social care mental health clients receiving services during the year: Rate per 100,000 population		Υ				٥	2	There are some concerns regarding the quality of this indicator	councils concerning service users with MH needs. Some indicator values for some councils are based on small numbers and should be treated with caution. The rate is not standardised for age and sex.	June 2014
90535	Depression and améety among social care users: % of social care users		Υ				٥	2	There are some concerns regarding the quality of this indicator	The survey is a sample of all adult social care clients. While this question asks directly about services, it is potentially subject to influence of exogenous factors, for example the characteristics of users	June 2014
90419	Mixed anxiety and depressive disorder: estimated % of population aged 16-74		Υ				٥	2	There are some concerns regarding the quality of this indicator	The data presented are only an estimation of the numbers likely to be diagnosable with the condition at any point in time. Not everyone with the condition seeks, or wants, treatment, and some will already have received it.	June 2014
91117	Estimated prevalence of opiates and/or crack cocaine use: rate per 1,000 aged 15 - 64		Υ				0	3	The quality of this indicator is robust		December 2014
92643	Contact with mental health or learning disability services: rate per 1,000 patients on GP practice list aged 18+		Υ				0	2	There are some concerns regarding the quality of this indicator	Uses MHLDDS data - includes adults with learning disabilities Jan 2017	January 2017
92107	Contacts with Community Mental Health Teams: rate per 100,000 population aged 16+				Y		0	3	The quality of this indicator is robust	disabilities 3dil 2017	March 2016
92108	Referrals received by Community Mental Health Teams: rate per 100,000 population aged 16+				Y		0	3	The quality of this indicator is robust		March 2016
92105	Older adult mental health admissions: rate per 100,000 population aged 65+				Y		0	3	The quality of this indicator is robust		March 2016
Ind ID	Access to Support	mbulance Trust	County / UA	District / UA	ne i rust Region	TP.		Data quality score	Data quality comment	Main concerns	ate of issessment
90646	Depression recorded incidence (QOF): % of practice register aged 18+	Y				- J)	-	3	The quality of this indicator is robust		June 2014
91242	Biopsychosocial assessment at the time of diagnosis of depression: % of newly diagnosed patients (aged 18+)	Υ					0	3	The quality of this indicator is robust		June 2014
91840	Exception rate for severe mental illness (SMI) QOF indicators: % of patients excluded from mental health quality indicators	Υ					0	3	The quality of this indicator is robust		June 2014
91841	Exception rate for depression: % of patients on depression register	Υ					0	3	The quality of this indicator is robust		June 2014
92380	Exception rate for dementia: % of patients on dementia register excluded from quality indicators	Υ					0	3	The quality of this indicator is robust		June 2014
90592	Access to IAPT services: people entering IAPT (in month) as % of those estimated to have anxiety/depression	Y					0	2	There are some concerns regarding the quality of this indicator	Indicator now flagged as "Amber" for data quality (March 2015) because source data has been agreed with CCGs	March 2016
90744	IAPT referrals for BME patients: % of referrals (in quarter)	Υ				Υ	•	2	There are some concerns regarding the quality of this indicator	Data are incomplete or missing for some CCCs due to incorrect commissioner code being provided. The data set may not include all IAPT activity. Some providers have coded the majority of referrals as ethnic group White - Any other White background rather than White a British. This means that in Q4 2014/15 IAPT use by BME groups appears high. CCGs affected by this have a data quality note.	
92006	IAPT waiting times < 6 weeks from referral to first treatment: % of referrals (in month)	Y					٥	2	There are some concerns regarding the quality of this indicator	The data set may not include all IAPT activity.The population denominator used is 18+. Although services were set up for adults, in some crumstance some services see 16 and 17 year olds	March 2016
92007	IAPT waiting times < 18 weeks from referral to first treatment: % of referrals (in month)	Y					٥	2	There are some concerns regarding the quality of this indicator	The data set may not include all IAPT activity. The population denominator used is 18+. Although services were set up for adults, in some circumstance some services see 16 and 17 year olds	March 2016
90599	Contact with specialist mental health services: rate per 100,000 population aged 18+ (end of quarter snapshot)	Υ					0	2	There are some concerns regarding the quality of this indicator	From Q4 2015/16, indicators affected by transition from MHLDDS to MHSDS	April 2017
90406	Receipt of assertive outreach services: rate per 100,000 population aged 18+ (end of quarter snapshot)	Υ					0	2	There are some concerns regarding the quality of this indicator	From Q4 2015/16, indicators affected by transition from MHLDDS to MHSDS	April 2017
90372	People on Care Programme Approach (CPA): rate per 100,000	Υ					0	2	There are some concerns regarding the quality of this indicator	From Q4 2015/16, indicators affected by	April 2017
90926	population aged 18+ (end of quarter snapshot)  Mental health service users on Care Programme Approach: % of mental	Υ			Y		0	2	There are some concerns regarding the quality of this indicator	transition from MHLDDS to MHSDS From Q4 2015/16, indicators affected by	April 2017
	health service users (end of quarter snapshot)							-	- on the desired of the motorior	transition from MHLDDS to MHSDS	

Ind ID	Access to Support	Ambulance Trust	County / UA	District / UA	MH Irust Region	STP		Data quality score	Data quality comment	Main concerns	Date of assessment
90405	Treatment by Early Intervention Teams: rate per 100,000 population aged 18+ (end of quarter snapshot)	Υ				Υ		2	There are some concerns regarding the quality of this indicator	From Q4 2015/16, indicators affected by transition from MHLDDS to MHSDS. From September 2014 the monthly source data reports used to compute this indicator were extended in scope to additionally cover Learning Disabilities services. Therefore, data are not comparable between August and September 2014 for some measures and so the September data cannot be used.	April 2017
90574	New cases of psychosis served by Early Intervention Teams: rate (annual) per 100,000 population aged 18+	Y				Υ	<u></u>	2	There are some concerns regarding the quality of this indicator	This is a modelled prediction so there is an inherent degree of uncertainty; the population denominator data used is pre-2011 census	June 2014
90955	BME mental health service users: % of mental health service users	Υ				Υ	<u>-</u>	2	There are some concerns regarding the quality of this indicator	Users where ethnicity is unknown are excluded from the denominator. For England, this is 15% of all users. There may be local variation in data quality and coding. The indicator measures the percentage of people using mental health services from black and minority ethnic groups - It does not necessarily reflect the total need for these services within the population.	June 2014
92438	NHS 111 calls regarding mental health - persons: Rate per 100,000 population	Y					0	3	The quality of this indicator is robust		August 2016
92421	NHS 111 calls regarding mental health - female: Rate per 100,000 population	Y					•	3	The quality of this indicator is robust		August 2016
92423	NHS 111 calls regarding mental health - male: Rate per 100,000 population	Y					0	3	The quality of this indicator is robust		August 2016
92424	NHS 111 calls regarding mental health made by those <18 years old: % of mental health calls	Υ					0	3	The quality of this indicator is robust		August 2016
92425	NHS 111 calls regarding mental health made by those 18 to 64 years old: % of mental health calls	Y					0	3	The quality of this indicator is robust		August 2016
