

# Perinatal Mental Health Profiling Tool - Indicator Quality Assessment

Ind ID	Indicator name	Acute Trusts	CCG	County / UA	Data quality score	Data quality comment	Main concerns	Date of assessment
<b>Demographics</b>								
92334	Aged <20 at antenatal booking: % of women	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92956	Aged 40+ at antenatal booking: % of women	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92957	BAME groups at antenatal booking: % of women	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92266	General fertility rate: birth rate per 1,000 females aged 15-44 years		Y	Y	3	The quality of this indicator is robust		Jun-17
92374	Women of childbearing age (15-44): % of total population		Y	Y	3	The quality of this indicator is robust		Jun-17
92865	Births to non-UK parents: % of live births		Y	Y	3	The quality of this indicator is robust		Jun-17
92866	Births to mothers aged <20: % of live births		Y	Y	3	The quality of this indicator is robust		Jun-17
92867	Births to mothers aged 40+: % of live births		Y	Y	3	The quality of this indicator is robust		Jun-17
<b>Risk and related factors</b>								
92280	Complex social factors: % of pregnant women	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92281	Multiparity (3+ previous births): % of pregnant women	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92946	Skin to skin contact after birth: % of mothers	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92339	Unplanned caesarean sections: % of deliveries	Y			3	The quality of this indicator is robust		Jun-17
92340	Preterm births: % of deliveries	Y			3	The quality of this indicator is robust		Jun-17
92272	Sole registered births: % births registered by one parent only		Y	Y	3	The quality of this indicator is robust		Jun-17
92530	Stillbirths: rate per 1,000 births		Y	Y	3	The quality of this indicator is robust		Jun-17
92196	Infant mortality: rate per 1,000 births		Y	Y	3	The quality of this indicator is robust		Jun-17
20401	Under 18s conception rate: rate per 1,000 females aged 15-17		Y	3	3	The quality of this indicator is robust		Jun-17
339	Child poverty: % of children aged 0-15 (IDACI)		Y	Y	3	The quality of this indicator is robust		Jun-17
848	Depression: % recorded prevalence		Y	Y	3	The quality of this indicator is robust		Jun-17
90581	Severe mental illness: % recorded prevalence		Y	Y	3	The quality of this indicator is robust		Jun-17
92270	Looked after children aged <5: rate per 10,000 population <5		Y	3	3	The quality of this indicator is robust		Jun-17
90835	Parents in drug treatment: rate per 100,000 children aged 0-15		Y	3	3	The quality of this indicator is robust		Jun-17
90836	Parents in alcohol treatment: rate per 100,000 children aged 0-15		Y	3	3	The quality of this indicator is robust		Jun-17
90412	Lone parent households: % of households		Y	3	3	The quality of this indicator is robust		Jun-17
92863	Domestic abuse-related incidents and crimes: rate per 1,000		Y	2	2	There are some concerns regarding the quality of this indicator	Recording and reporting differences can have large effect	Jun-17
11501	Homelessness rate: rate of acceptances per 1,000 households		Y	3	3	The quality of this indicator is robust		Jun-17
<b>Prevalence</b>								
92262	Postpartum psychosis: estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
92261	Chronic SMI in perinatal period: estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
92264	Severe depressive illness in perinatal period: estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
92259	Mild-moderate depressive illness and anxiety in perinatal period (lower estimate): estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
92260	Mild-moderate depressive illness and anxiety in perinatal period (upper estimate): estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
92263	PTSD in perinatal period: estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
92257	Adjustment disorders and distress in perinatal period (lower estimate): estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
92258	Adjustment disorders and distress in perinatal period (upper estimate): estimated number of women		Y	Y	2	There are some concerns regarding the quality of this indicator	Not adjusted for local factors.	Jun-17
<b>Identification &amp; Access</b>								
92332	Early antenatal booking: % of women	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92275	Mental health detection at antenatal booking: % valid completion	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92277	Support status recorded at antenatal booking: % valid completion	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92276	Substance use recorded at antenatal booking: % valid completion	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92278	Alcohol consumption recorded at antenatal booking: % valid completion	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92279	Complex social factors recorded at antenatal booking: % valid completion	Y			2	There are some concerns regarding the quality of this indicator	Experimental data. Not all Providers are yet submitting.	Jun-17
92351	Antenatal MH detection: Survey score 1=Worse than expected, 2=Same, 3=Better	Y			2	There are some concerns regarding the quality of this indicator	Small sample size and potential response bias.	Jun-17
92352	Postnatal MH detection: Survey score 1=Worse than expected, 2=Same, 3=Better	Y			2	There are some concerns regarding the quality of this indicator	Small sample size and potential response bias.	Jun-17
92353	Information on emotional change after birth: Survey score 1=Worse than expected, 2=Same, 3=Better	Y			2	There are some concerns regarding the quality of this indicator	Small sample size and potential response bias.	Jun-17
92354	Postnatal MH support: Survey score 1=Worse than expected, 2=Same, 3=Better	Y			2	There are some concerns regarding the quality of this indicator	Small sample size and potential response bias.	Jun-17
92346	Health Visitor new birth visits < 14 days: % births		Y	2	2	There are some concerns regarding the quality of this indicator	Interim reporting system. May be data quality issues.	Jun-17
92347	Health Visitor review by 8 weeks: % births		Y	2	2	There are some concerns regarding the quality of this indicator	Interim reporting system. May be data quality issues.	Jun-17
92348	Health Visitor 12 month review: % of children		Y	2	2	There are some concerns regarding the quality of this indicator	Interim reporting system. May be data quality issues.	Jun-17
