

Data for the updated indicators listed below have been added to the [Productive Healthy Ageing Profile](#) data tool as part of the November 2020 update. These are provided at local authority level and at aggregated geographies, unless otherwise indicated. Further details regarding the geographies and inequality breakdowns available for all indicators in the Profile are provided [here](#).

Domain & Indicator name	Time period added	Already in public domain in exact format?
Optimise Health & Reduce Risks Early		
Life expectancy at birth	2017-19	Yes, calculated by ONS
Life expectancy at 65		
Population vaccination coverage – PPV (age 65+)	2019/20	Yes, calculated by PHE (confidence intervals added in the Profile)
Improve Wellbeing & Wider Determinants of Health		
Percentage of people aged 16-64 in employment <i>Note: England & local authority inequality breakdowns include by age 50-64</i>	2019/20	Yes, calculated by ONS (NOMIS). PHE added confidence intervals.
Percentage of homes fail the Decent Homes Standard (ENGLAND)*	2018	Yes, calculated by the Ministry of Housing, Communities & Local Government
Percentage of homes fail the minimum housing standard (ENGLAND)*		
Demographics & Mortality

Mortality rate from all cardiovascular diseases, ages 65+ years		
Under 75 mortality rate from respiratory disease		
Mortality rate from all respiratory disease, ages 65+ years		
Under 75 mortality rate from cancer		
Mortality rate from cancer, ages 65+ years		
Percentage of deaths with underlying cause circulatory disease, for age groups: all ages, ages under 65, 65-74, 75-84 and 85+ years #	2019	No, calculated by PHE from data provided by ONS
Percentage of deaths with underlying cause respiratory disease, for age groups: all ages, ages under 65, 65-74, 75-84 and 85+ years #		

Percentage of deaths with underlying cause cancer, for age groups: all ages, ages under 65, 65-74, 75-84 and 85+ years #		
Excess winter deaths index (ages 85+)	Aug 2018 to Jul 2019	No, calculated by PHE from data provided by ONS

* The housing quality indicators are only available at England level but include useful inequality breakdowns by household composition, tenure and area deprivation, and trends since 2008.

The percentage of deaths indicators are available by pre-April 2020 Clinical Commissioning Group (CCG) and Sustainability & Transformation Partnership (STP), but have only been updated for those organisations remaining after the post April 2020 changes. The next tool update in December will provide the option to select and display the full set of 2020-21 organisations. In the meantime, these can be viewed in the November update of the separate tool [Palliative and End of Life Care Profiles](#).
