

Data for the updated indicators listed below will be added to the [Productive Healthy Ageing Profile](#) data tool as part of the February 2020 update. All will be provided at local authority level and other geographies unless indicated otherwise. Further details regarding the geographies and inequality breakdowns available for all indicators in the Profile are provided [here](#).

Domain & Indicator name	Time period added	Already in public domain in exact format?
Optimise Health & Reduce Risks Early

* Just Region and England level

An error was identified for indicators based on hospital episode statistics (HES) data which gave misleading results for areas within the South East region and East Sussex. Affected areas have been suppressed or flagged to be treated with caution. Full details will be added to the caveats section of the descriptive metadata for each affected indicator.

CQC: Care Quality Commission; ONS: Office for National Statistics; PHE: Public Health England
