

Data for the updated indicators listed below have been added to the [Productive Healthy Ageing Profile](#) data tool as part of the April 2020 update. These are provided at both local authority and clinical commissioning group (CCG) level, and aggregated geographies, unless indicated otherwise. Further details regarding the geographies and inequality breakdowns available for all indicators in the Profile are provided in the updated Excel workbook [here](#). Please also note the change in dementia definition for hospital admissions and mortality indicators.

Domain & Indicator name	Time period added
Reverse or Live Well with a Long-term Condition	
Emergency hospital admissions for COPD ¹	2018/19
Dementia: Crude Recorded Prevalence (aged under 65 years) per 10,000	2019 (as at 31 December)
Dementia (aged under 65 years) as a proportion of total dementia (all ages) per 100	2019 (as at 31 December)
Dementia: Recorded prevalence (aged 65 years and over)	2019 (as at 31 December)
Dementia: Direct standardised rate of emergency admissions (aged 65 years and over) ^{1,2}	2018/19
Dementia: Direct standardised rate of emergency admissions (aged 65 years and over) - CCG responsibility ^{2,3}	2018/19
Enhance Care & Support	
Carer-reported quality of life score for people caring for someone with dementia	2018/19
Demographics & Mortality	
Direct standardised rate of mortality: People with dementia (aged 65 years and over) ²	2018

1. Available at local authority, Region and England level in the tool
2. Revisions have been made to the International Classification of Diseases 10 (ICD) codes used to define the dementia cohort and now includes dementias and Alzheimer's Disease. The changes affect indicators based on the HES database and ONS: Public Health England Annual Mortality Extract datasets. The indicators have been backdated three years and use the latest geographical boundaries.
3. Available at CCG and STP level in the tool
